Investment principles

Megatrends — long-term changes that transform our lives

- The manager identifies megatrends — structural and long-term changes that transform our lives.
- **Demographic** changes are characterized by growing world population, increasing longevity, increasing quality of life and importance of human capital as well as change in generational preferences.
- **Urbanization** implies growth of cities and its densities.
- **Digitalization** is about increasing importance of digital data, softwarization of processes and focus on productivity.
- **Environmental** changes denote growing necessity for sustainable use of natural resources.
- Then we identify **16 themes** that are synchronized with development of these trends: Robotics, Security, Cloud Technology, Virtual Life, Digital Data, Life Science, Health Care, Entertainment, Education, Water, Agriculture, Waste, Clean Energy, Mobility, Infrastructure, Financial Edge.
- We invest in companies poised to benefit from megatrends and themes.

Proprietary 10-factor and 100-subfactor model

- The investment manager exploits original proprietary multi-factor scoring system based on **10 factors** and **100 subfactors** (101 for banks) as a quantitative tool for determining securities with advantageous characteristics.
- Each factor comprises a group of subfactors with 5 to 16 in each.
- Threshold characteristics of each subfactor is based on multidecade financial and market metrics of more than 10 000 global securities.
- The manager assigns score of 1 as minimum value of any factor or subfactor and score of 10 as maximum value.
- The Fund provides exposure to companies with high aggregate score across all 10 factors avoiding firms of average or below average ranking.

- From April 2021, the strategy followed was the Absolute Return. However, please note that from September 2022 onwards, the strategy changed to Thematic Alpha. There was a re-naming of shares. This did not reshape the share price but the whole strategy was fully reviewed and changed to Thematic Alpha. The Fund name was changed since 01.09.2022 from SFARF to STAF.

Risk factors

- Equity Risk. Investing in equity shares means taking a stake in the performance of that company, participating in the profits it generates by way of dividends and any increase in its value by way of a rise in its share price. However, such equity shares may also depreciate in value and lead to substantial losses of up to the total amount invested should an underlying company file for bankruptcy.
- Currency Risk. The Fund may have multiple non-US Dollar currency exposures and such exposures will be unhedged. These non-USD currencies may depreciate against the US Dollar and lead to losses.
- For a more detailed explanation of risks, please refer to the "Risk Factors" section of the Private Placement Memorandum.
